/29adithya

Passionate Electronics and Communication Engineering undergraduate focused on applying technical knowledge, problem-solving abilities, and practical skills to contribute effectively in technology-driven industries while gaining hands-on experience through real-world engineering applications.

Academic Qualification

National Engineering College, Kovilpatti

B.E Electronics and Communication Engineering

2023-2027

CGPA : 8.45 (till 5th Semester)

Sri Jayendra Saraswathi

Swamigal Silver Jubilee School,

Tirunelveli.

HSC : 78.50% (2022 - 2023)

Technical Skills

- KiCad
- Arduino IDE
- Tinkercad
- CST Software

Areas of Interest

- BJT Circuits
- Combinational Logic Circuits
- PCB Design Fundamentals

Projects

• Automated Weight-Controlled Bulk Material Delivery and Split Distribution System for Transport Vehicle

Implemented an automated weight-based material distribution system using sensor interfacing techniques to ensure accurate dispensing, controlled delivery, and efficient bulk material management in transport vehicles.

• Water Quality Detection for Fish Feeding

Developed a sensor-based water quality monitoring system to analyze essential water parameters and support efficient fish feeding conditions using embedded system concepts.

Internship

- Designed basic PCB layouts and explored schematic development concepts during PCB design internship, strengthening understanding of electronic hardware design fundamentals.
- Explored microcontroller concepts, embedded system fundamentals, and basic interfacing techniques through practical embedded systems training.
- Completed C programming internship at CodSoft, strengthening problem-solving abilities and object-oriented programming concepts through practical coding tasks.

Personal Strengths

- Team Collaboration & Project Coordination
- Adaptable to emerging technologies
- Self-driven with a commitment to continuous improvement
